INTRODUCTION OF THE NATIONAL MS AND PARKINSON'S DISEASE REGISTRIES ACT

HON. CHRIS VAN HOLLEN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 5, 2009

Mr. VAN HOLLEN. Madam Speaker, along with the co-chairs of the Congressional Caucuses on MS and Parkinson's disease, we are pleased to introduce the National MS and Parkinson's Disease Registries Act—which, for

the first time, establish national Multiple Sclerosis (MS) and Parkinson's disease registries at the Centers for Disease Control and Prevention (CDC).

Currently, a national coordinated system to collect and analyze data on MS or Parkinson's disease does not exist. Accurate incidence and prevalence information is critical to gain a better understanding of these diseases that are estimated to affect more than 1.4 million Americans. The current lack of core knowledge about who has MS and Parkinson's disease and why inhibits research, programs, treatment and services.

This legislation will remedy that by developing coordinated, separate national systems to collect and store existing MS and Parkinson's disease data on incidence and prevalence. These registries could help uncover and inform promising areas of MS and Parkinson's research such as genetic and environmental risk factors, and support the discovery of disease therapies, treatments, and one day a cure. The information collected through the registries will provide a foundation for evaluating and understanding many factors such as geographic clusters of diagnosis, variances in the gender ratio, disease burden, and changes in health care practices.

Madam Speaker, this legislation represents an opportunity to move neurological disease research in a meaningful way that aims to improve the lives of our constituents with Parkinson's and MS. I invite my colleagues to join us in cosponsoring this much-needed bill.
